

Interactive whiteboards are an extremely effective tool in a 21st century school. If used efficiently they engage and motivate pupils and greatly support the lesson input for teachers. However, without curriculum focused training for all staff, the boards will rarely be used to best advantage and may just become a very expensive projector screen.

ICTinspires offer a half day SMART Board training course for all SMART board users to ensure interactive whiteboards enhance the learning and teaching in your school.

With teaching backgrounds and 20 years combined Curriculum ICT Adviser experience, Debbie Schofield and Anna Suggett have a wide breadth of knowledge and resources on which to draw. Our aim is to provide schools with high quality ICT CPD courses aimed at enhancing teacher's classroom practice.

SMART Board course content:

With teaching backgrounds we know that teachers want more from a SMART Board training session than simply 'how to use an interactive whiteboard'. We ensure the training is curriculum led and clearly demonstrates practical ideas for enhancing lessons. The day course will include :

- Ensure teachers are able to use all the interactive whiteboard tools and create and edit resources within SMART Notebook
- Give suggested curriculum applications of the various SMART Board functions
- Show how to capture images from DVD to storyboard in SMART Notebook
- Give teachers directed time to explore and experiment with the demonstrated ideas
- Demonstrate linking to external resources when preparing lessons
- Show how to integrate sound
- Make full use of the gallery

Course venue: **Wickford Centre, Alderney Gardens, Wickford, SS11 7JZ :**

Monday 25th June

9.30 am. — 12.30 pm.

The cost of this half day course is £80 (Inc. refreshments)
