

ICT in Education is always changing! Keeping abreast of ways ICT can support learning and teaching as well as knowing the new technologies available is not easy. Many schools are currently unsure how to move forward with ICT as a curriculum within their school. Should they still use QCA ICT Scheme of Work? Should they be teaching ICT as a discrete subject or should it be only taught through other subjects? Is the current scheme provide breadth of coverage? Is ICT being assessed? Is it recorded, and informing parents?

ICTinspires offer a half day course aimed at helping Primary teachers develop a current ICT Curriculum with methods for monitoring and assessing.

With teaching backgrounds and 20 years combined Curriculum ICT Adviser experience, Debbie Schofield and Anna Suggett have a wide breadth of knowledge and resources on which to draw. Apart from working with many schools, offering curriculum ICT support, advice and training, they work with local and national companies and many Local Authorities around the country to ensure the support and advice offered is current, offers best value and meets the demands of a 21st century curriculum.

ICT Progression and Assessment course content:

The course will include:

- Specialist subject support— linking to Ofsted framework.
- Embedding ICT through a creative curriculum
- Reviewing ICT progression through Herefordshire LA documentation
- Monitoring breadth of coverage
- Assessment from EYFS to Y6
- A focus on ensuring all aspects of e-safety are covered
- Assessment and monitoring of ICT

Course venue: **Groewood Primary School, Grove Road, Rayleigh SS6 8UA:**

Tuesday 19th June

1.30 am. — 4.30 pm.

The cost of this half day course is £80 (Inc. refreshments)
