

Many schools have software that is often unused or is now not fit for purpose - perhaps a legacy of e-Learning Credits or Software for Schools Vouchers. Schools may not have had reason to review their software provision nor have had the opportunity to identify whether it effectively delivers the ICT curriculum. Without guidance they risk commissioning the same software on a new system. Unused or out of date software could result in unnecessary expenditure.

As former Essex Curriculum ICT Advisers with over 20 years combined experience in supporting schools, ICTInspires have all the experience and expertise in helping educational establishments select current software, freeware and peripherals (data loggers, microphones, cameras etc.) to best support their curriculum .

**The software audit will be conducted over two visits producing a final comprehensive list for the school and server provider if applicable.**

---

*Our aim is to provide schools with high quality ICT support tailored to their curriculum needs.*

---

**The cost of all licence implications for new software will be researched and provided. At the end of the booked time ICTInspires will produce an agreed list of software required for the new server.**

#### Visit One:

- First audit of all software curriculum and peripherals
- Provide school with staff audit to assess wants/needs/likes/dislikes

**The staff software audit will need to be completed and returned between visits.**

#### Visit Two (with Senior Leadership Team):

- Produce analysis of staff software audit for discussion
- Curriculum mapping of audited software to identify gaps required for curriculum and advise of alternatives
- Produce final list of chosen software to ensure breadth of provision for the ICT curriculum with associated licence costs where necessary

---

**The cost of this software audit visits and concluding report is £350 + VAT**
